

Jeet Patel

Data Analytics & Full-Stack Developer

Ahmedabad, India | jeet310704@gmail.com | +91 96242 80429 | github.com/jeet310704 | linkedin.com/in/jeet3174

SUMMARY

Computer Science Engineering graduate (May 2026) focused on data analytics and full-stack web development. Works with Python, SQL, and Power BI to explore data and build responsive, AI-integrated web applications, and is actively strengthening data analysis skills through hands-on projects. Strong foundation in problem-solving, clean coding, and collaborative software delivery.

EDUCATION

Indus University	Aug 2022 – May 2026
B.Tech in Computer Science Engineering	GPA: 8.79 / 10

EXPERIENCE

AI / ML Intern • ConcatString	May 2026 – Present
- Design and build AI-integrated projects independently, applying machine learning to practical business use cases. - Helped automate the inventory management process, reducing manual effort and improving operational efficiency. - Manage day-to-day inventory operations while developing AI-driven tools to streamline internal workflows.	
Web Development Intern • Silver Touch Technologies Ltd	June 2025
- Developed responsive, cross-browser web interfaces using HTML, CSS, and JavaScript for production projects. - Implemented UI components and resolved bugs, improving page performance and overall user experience. - Applied clean-code practices and version control while collaborating within a real-world development team.	

PROJECTS

AI Business Analytics Dashboard	Next.js • TypeScript • Supabase • Gemini API
- Built a multi-tenant business-intelligence platform with CSV/XLSX upload to process sales, expense, and inventory data. - Designed analytics views tracking KPIs, revenue charts, and profit forecasts across multiple tenants. - Integrated the Gemini API to generate natural-language summaries explaining key patterns and business insights.	
MuscleMetrics – Social Fitness App	React • Node.js • Express • MongoDB • Socket.IO
- Built a full-stack MERN social fitness app for logging workouts, tracking streaks, and recording personal bests. - Implemented real-time messaging, a live activity feed, and weekly/all-time leaderboards using Socket.IO and JWT auth. - Added an AI coach for personalized workout recommendations, progress charts, and reusable workout templates.	
Sales Analytics Dashboard	Python • SQL • Pandas • Power BI
- Developed an end-to-end pipeline that cleaned and transformed raw CSV data with Pandas for reporting and analysis. - Wrote SQL queries analyzing revenue, profit, products, regions, and customer segments. - Created interactive Power BI dashboards surfacing sales trends and actionable business insights.	
Customer Churn Analysis & Prediction	Python • SQL • Scikit-learn • Power BI
- Explored customer data (tenure, charges, contract type, payment method) to identify key churn drivers. - Compared churn rates across customer segments using SQL aggregation queries. - Trained a Scikit-learn classification model to predict churn and support retention strategy.	

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, TypeScript
Data Science & Analytics	Pandas, NumPy, Scikit-learn, Data Cleaning, Exploratory Data Analysis, Power BI, KPI Reporting
AI	Gemini API, Prompt Engineering, AI-Assisted Development
Web & Backend	React, Next.js, Node.js, Express, Tailwind CSS, REST APIs, Socket.IO, JWT Authentication
Databases & Tools	MongoDB, Supabase, SQLite, Git, GitHub, Cloudinary
