Education

Indus University, BTech in Computer Science

[Aug 2022 – May 2026]

GPA: 8.79/10

Experience

Software Development Intern – Nypix Technologies LLP

[June 2024]

- Assisted in requirement analysis, development, and testing of software modules
- Collaborated with teams to understand project workflows and development cycles
- Improved debugging, problem-solving, and teamwork skills

Web Development Intern – Silver Touch Technologies Ltd

[June 2025]

- Built responsive web pages using HTML, CSS, and JavaScript
- Worked on UI development, bug fixes, and performance optimization
- Followed clean coding practices in real-world projects

Technical skills

Languages: Python, JavaScript, C++, C, HTML, CSS

Frameworks & Libraries: React, Tailwind CSS, Express.js

Database & Tools: MongoDB Atlas, Git, GitHub, Vercel, Render

AI/ML: Machine Learning, Artificial Intelligence (Basic Concepts & Implementation), AI-Assisted Development & Prompt Engineering

Web Development: Responsive Design, UI Development, REST APIs, Authentication Systems, Real-Time Features (Socket.IO)

Projects

MuscleMetrics

Built a **full-stack** social fitness platform using **React**, **Express.js**, **MongoDB**, and **Tailwind CSS**. Implemented workout tracking, leaderboards, messaging, real-time notifications, and AI-powered workout recommendations with cloud deployment on Vercel and Render.

Alvyto – AI Smart EMR

Developed an **AI**-powered EMR system using **Next.js** and **FastAPI** that converts doctor–patient conversations into structured medical records using speech-to-text and automated summarization. Added appointment scheduling, queue management, and role-based access control.

AI Business Dashboard

Built a multi-tenant **AI** analytics SaaS using **Next.js**, **TypeScript**, **Supabase**, and **Gemini API**. Developed secure authentication, CSV/XLSX data pipelines, real-time dashboards, and AI-generated business insights.
